

## Performance and Quality Measures

Southeastern Consultants, Inc. (SEC) is a national pharmaceutical and health care consulting and data analysis firm providing services to health plans, benefit managers, employer and provider groups, government agencies, associations, medical and pharmaceutical industry, disease management organizations, and academic institutions. SEC provides services to clients for identifying opportunities to improve the coordination of care and intervention strategies to achieve cost savings. SEC can deliver metrics and studies related to care coordination, uncoordinated care, medication use management, and other measures. In turn, providers and other groups may use SEC services to support related quality and performance measure issues that may arise in the context of programs and grants. SEC can also provide – with key partners in the policy development space – insights to improve Federal and State quality measurement and reporting programs.

- Reduce unnecessary costs
  - Improve quality of care
  - Medication use management
  - Disease and care management
  - Address disparities
- Identify and classify patient safety and access issues
  - Solve program and process problems
